

Delbarton School

Daily Medical Regulations

Students are not permitted to carry any medication during the school day unless it is for emergency purposes. Epipens and inhalers can be carried by the student when the written order from the doctor and permission of the parent is on file with the nurse. A [Medication Request Form](#) must be on file before the nurse is allowed to give any medications, including Tylenol.

Any student who needs to leave school during the day due to illness must be seen first by the school nurse.

All injuries must be reported to the school nurse. All excuses for gym/sports must be given to the nurse. The school has accident insurance coverage through Bollinger Insurance Company. Notify the nurse if you wish to file a claim. Claims must be filed within 90 days of the date of injury.

All infectious diseases (i.e., mononucleosis, strep throat, impetigo, flu, conjunctivitis) are to be reported to the nurse. Please keep your sons home when they are ill, and notify the nurse at extension 3080 of extended illness/surgery/special needs.

If your son is going on a field trip or staying on campus for an evening or weekend event, please notify the faculty in charge of any specific health needs. This includes asthma, diabetes, seizure disorder, and allergic conditions which may require the use of an Epipen. Students with inhalers and/or Epipens should carry their own with them at all times.
